Window Limit Switch Circuit

CIRCUIT DESCRIPTION
This switch functions to turn "OFF" before the top dead center, and ECU reads this "OFF signal resulting in closing the window fully.

WIRING DIAGRAM

[Diagram showing the connection between the window limit switch, back window limit switch, and the back door ECU]
INSPECTION PROCEDURE

1. Check window limit switch (See page BE-65).
   - NG: Replace window limit switch.
   - OK

2. Check harness and connector between window limit switch and back door ECU (See page IN-28).
   - NG: Repair or replace harness or connector.
   - OK

Proceed to next circuit inspection shown on problem symptoms table (See page DI-556).
